Experiment 14: Creating a Virtual Hard Disk

Aim:
To create and allocate storage to a virtual hard disk using VMware Workstation.

Algorithm / Steps:

1. Open VMware Workstation.
2. Select the required virtual machine.
3. Open VM Settings.
4. Select Add and choose Hard Disk.
5. Select the virtual disk type.
6. Choose Create a New Virtual Disk.
7. Specify the required storage capacity.
8. Select the disk storage format and finish the setup.

Output:

A virtual hard disk was successfully created and allocated to the VM.

Result:

Virtual storage was successfully created using VMware Workstation.
