Experiment 16: Cloning a Virtual Machine

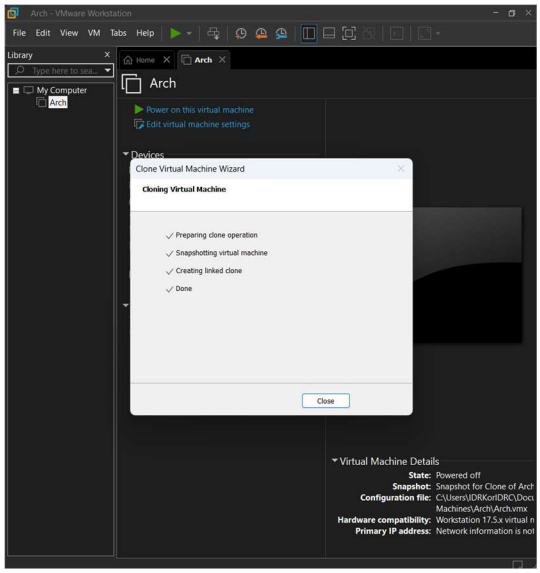

Aim:
To create and test a clone of an existing virtual machine using VMware Workstation.

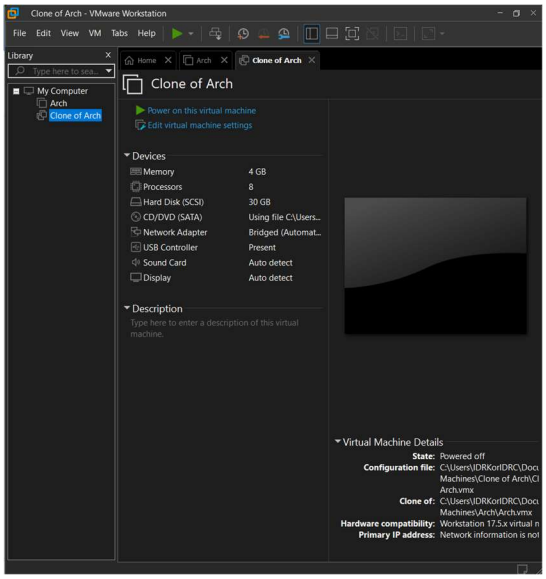

Algorithm / Steps:

1. Shut down the virtual machine.
2. Right-click the VM in VMware Workstation.
3. Select Manage → Clone.
4. Choose the current state or an existing snapshot.
5. Select Full Clone.
6. Enter the clone name and storage location.
7. Complete the cloning process.
8. Power on the cloned virtual machine.
9. Verify that the cloned VM operates independently.
