EXPERIMENT 6 - PAYROLL PROCESSING SYSTEM

Aim

To create a payroll processing form in Zoho Creator that records employee information, calculates gross pay from earnings, and determines net pay after applying deductions.

Requirements

- Zoho Creator application
- Web browser
- Internet connection

Procedure

1. Open Zoho Creator and create a new application named Payroll Processing System.
2. Create a form titled Payroll Details to store employee and salary information.
3. Add the fields Employee Name, Employee ID, Basic Pay, HRA, DA, TA, CCA, PF, Income Tax(IT), and LOP.
4. Configure Employee Name as a text field, Employee ID as a text or number field, and all paycomponents as numeric fields.
5. Add Gross Pay and Net Pay fields to hold the calculated salary values.
6. Configure Gross Pay to add Basic Pay, HRA, DA, TA, and CCA.
7. Set Net Pay to subtract PF, Income Tax (IT), and LOP from Gross Pay.
8. Save the form and open the live application to test the salary calculations.
9. Enter the sample employee details and the earnings and deduction amounts listed below.
10. Submit the form, open the saved record, and verify the calculated Gross Pay and Net Pay.

Sample Input

- Employee Name: ASH KETCHUM
- Employee ID: 19212
- Basic Pay: INR 50,000
- HRA: INR 6,000
- DA: INR 4,500
- TA: INR 2,000
- CCA: INR 1,500
- PF: INR 2,400
- Income Tax (IT): INR 1,000
- LOP: INR 500

Calculation

Gross Pay = Basic Pay + HRA + DA + TA + CCA

Gross Pay = 50,000 + 6,000 + 4,500 + 2,000 + 1,500

Gross Pay = INR 64,000

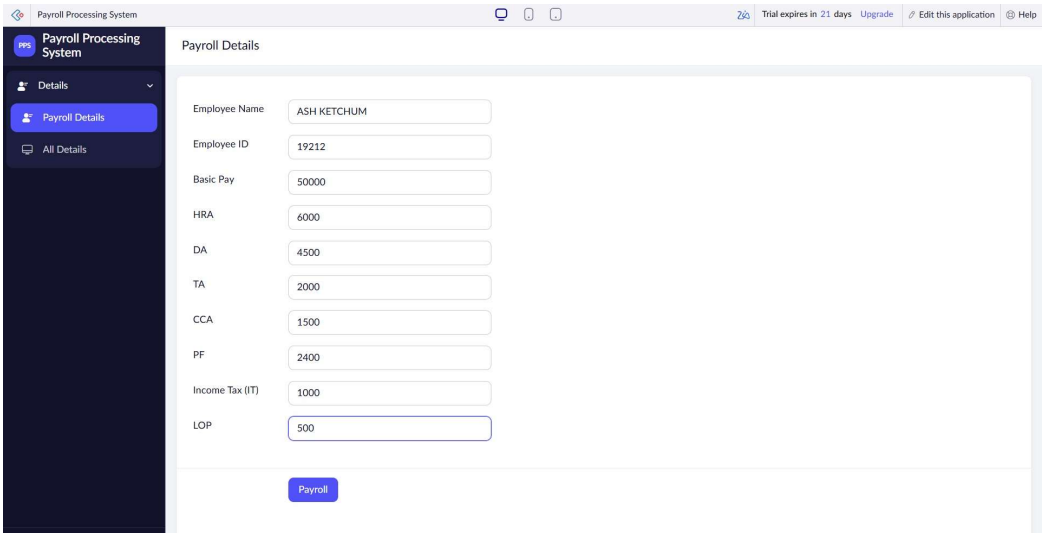

Net Pay = Gross Pay - PF - Income Tax - LOP

Net Pay = 64,000 - 2,400 - 1,000 - 500

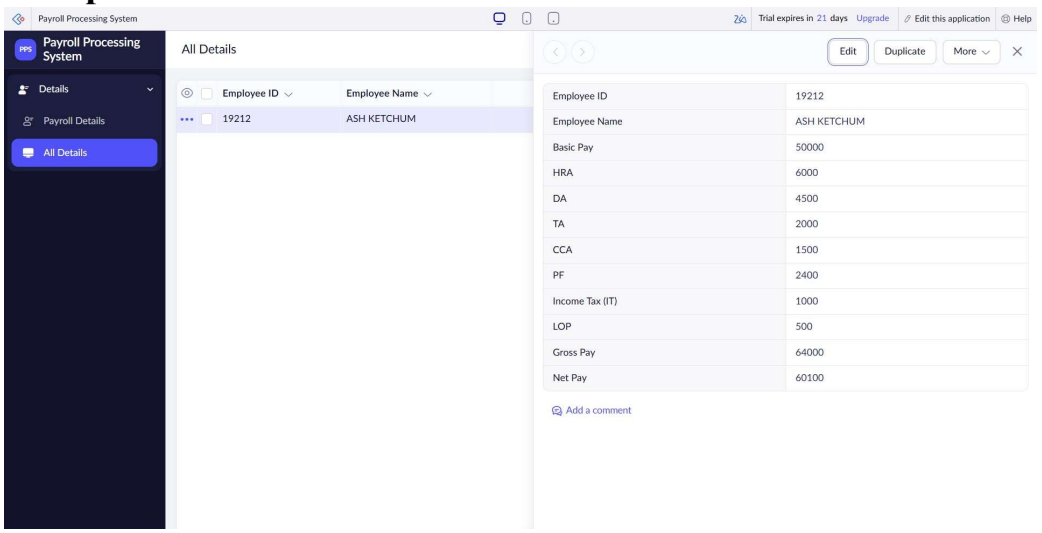

Net Pay = INR 60,100

Implementation Screenshots

Input Form

Saved Output Record

Result

The Payroll Processing System was created and tested successfully in Zoho Creator. For the sample employee, the calculated Gross Pay is INR 64,000 and the Net Pay is INR 60,100.
